PORTFOLIO
fedorov-design.vercel.app/en

Seven years in web and product teams. I take a product from user interviews to handoff and build a design system along the way, so the team can keep growing the interface without me.

01 / EXPERIENCE

22.02.2022 — NOW

Signals specialist SERVICE

Armed Forces of Ukraine

- Mobilised in the first days of the full-scale invasion; went from rifleman in an infantry unit to signals specialist in a reconnaissance company.
- Run my unit's communications: deploying signal points, setting up, diagnosing and repairing equipment, satellite internet.
- Built and documented company command procedures — regulations, reporting, how information passes between units.
- Train personnel on communications equipment. Decorated (2022, 2023, 2024, 2025).

08.2021 — 02.2022

UI/UX Designer & Mentor

Wgroup · Mykolaiv

- End-to-end product design: research, information architecture, Figma prototypes, handoff, UI QA.
- Led two designers: goals, regular 1:1s, work reviews, growth plans.
- Built the design system: tokens, component libraries, rules for updates and upkeep.

03.2020 — 01.2022

UX Designer → Product Designer

Subscription Media Platform (NDA) · remote (part-time)

- Designed the end-to-end user journey: onboarding, paywall and subscriptions, catalog, viewing, profiles.
- Built a design system from scratch — tokens, components, states, responsive grids — and cut the time to new screens.
- Designed the creator dashboard: content analytics, subscription management, payouts.
- Research: user interviews, clickable prototypes, quick iterations to the final UI.

05.2019 — 08.2021

UI/UX & Web Designer

Veronikalove · Mykolaiv (part-time)

- Websites and mobile apps, email campaigns, light interface motion.

2016 — 2019

Web designer

Dizz agency (Kyiv), SugarTheme (Mykolaiv)

— Multi-page ThemeForest templates, responsive design, landing pages, brand identity.

02 / SKILLS

DESIGN	UX research, information architecture, prototyping, UI, design systems and tokens, responsive and mobile design
